Bearing

Dual Precision.
Friction and single precision available.
HDPE threadguard.
Anti-rust coating prevents failures.
Sealed to keep out debris.
Patented precision bearing.

- Diameter - 5"
- Tread Width - 1.25"
- Hub Width - 1.6"
- Load Capability - 250 lbs
- Weight - 0.64 lbs
- Hardness (durometer) - 80A
- Bearing - Dual Precision
- Bore - 5/16"
- Operating Temperature - -40° C to 71° C

Designed to Fit A Range of Applications

The P&H SuperWheel is extremely abrasion resistant and have a high degree of surface grip. The tread resists sliding laterally, which allows the rear wheels to rotate as the cart is pushed manually or by cart collection equipment. It is far more resistant to the development of flatspots than standard shopping cart wheels.

The P&H SperWheel has easy maneuverability, smooth and quiet operation, absorbs impact and vibration, rolls effortlessly, resists wheel damage from sideways dragging and gives you a superior shopping experience.
